

Healthcare & Life Sciences Solutions

Technology that promotes patient care and research success.

Workflow Automation

Boost efficiency and quality control with workflow automation. We provide a wide variety of printers, scanners, mobile computers, RFID technology, standard and custom labels, verifiers, electronic shelf labels, kiosks and more.

Barcode Label Design & Management

Simplify your barcode labeling process with comprehensive enterprise label management solutions that improve efficiency through print automation, label management, and browser-based printing. We provide solutions from Teklynx and BarTender.

Industrial Wireless Networking & Switching

Cutting edge wireless networking solutions and services that enable you to fully optimize and deploy robust and unified wireless networks for their facility's IT infrastructure.

Real-Time Cold Storage Monitoring

Monitor cumulative heat exposure temperature, threshold heat events, freeze events, or a combination of both. We provide a wide range of time-temperature indicators for temperature sensitive vaccines, pharmaceuticals, and medical devices.

Healthcare & Life Sciences Cybersecurity

A comprehensive cybersecurity solution that fuses a deep understanding of medical workflows and protocols with today's cybersecurity threats, so hospitals can confidently connect and operate all clinical assets on their network while ensuring patient privacy and safety.

Digital Headsets

Empower teams to talk hands-free in the OR and adjacent rooms. Digital headsets enable clear, calm communication between every member of the team with no raised voices nor straining to hear, reducing stress and creating a better working environment.

Device Management Applications

Maximize productivity and gain control of your devices throughout their entire lifecycle, from provisioning to retirement. We help you implement a custom mobile device management solution that ensures your devices are ready for your business demands.

Facility Security Systems

A wide range of security products and systems that include video surveillance, access control, and more. From simple installations to extensive projects, we offer integrated security solutions based on intelligent technology, backed by superior support.
