

**Savant WMS's latest release includes an embedded Shipping Manifest!**

SAVANT WMS IS ONE OF THE MOST VALIDATED (ABOVE CERTIFIED) WMS/SHIPPING MANIFEST SOLUTIONS IN THE ZEBRA PARTNER COMMUNITY

# Automate Shipping for all of your carriers

## ➤ Core Capabilities

### Parcel Shipping

We provide parcel carrier compliance, including labeling, reporting, and electronic manifesting. • FedEx Express • FedEx Ground • UPS • US Postal Service, and many more.

- ✓ Use your established rate discounts with Parcel carriers
- ✓ Dimensions and weights are used to calculate the correct shipping rate
- ✓ Print shipping labels
- ✓ Confirm the items that are being shipped in each box with the optional packing function

### LTL Shipping

Our platform offers a simplified process for connecting to many US-based LTL carriers, with the ability to rate shop across both parcel and LTL. This process simplifies transportation decisions and reduces costs.

- ✓ Use your established rate discounts with LTL carriers
- ✓ Request pickup and get Pro Numbers electronically
- ✓ Reduced labor cost through fewer manual processes
- ✓ Faster responses to shipping inquiries
- ✓ One system to manage all transportation needs

### Savant WMS Additional Options

- ✓ If GS-1 (UCC128) labels are needed, the Savant Shipping Manifest module can also produce those for each box and/or pallet as defined by the EDI Trading Partner. This is another benefit of connectivity between modules within the same system. The Advanced Shipping Notice (ASN) module is required for this function.
- ✓ If you are a Third Party Logistics company (3PL) then the shipping charges can be used to feed into the daily, weekly, or monthly billing of freight to each end-user customer.

## Rate Shopping

Carrier rate shopping is an automatic comparison of carriers' shipping services and their shipping rates in real-time in order to find the least expensive option. Using rate shopping eliminates manual decisions made by shipping personnel, saves time, and makes Shipping cost-effective.

- ✓ Automatically shop for the "best" carrier based on cost as well as delivery time
- ✓ Accurate decision-making on transportation pricing for both parcels and LTL's
- ✓ Calculate and compare alternate rates based on criteria such as negotiated and retail rates. This is useful for determining potential markups
- ✓ Stores retail rates, in addition to the actual carrier charges

## Printing Solutions

Savant Shipping Manifest supports forms and carrier-required documentation such as Manifest reports, Tracking labels, and Compliance labels.

- ✓ Supports multiple types of printers
- ✓ Enables users to manage multiple documents through one central system
- ✓ Labels pre-configured to meet carrier specifications

## Accessorials and Billing Options

- ✓ Certain carrier accessorial charges can be added, such as Declared Value insurance and Signature Required
- ✓ Customer billing accounts can be defined in the ERP system or in the Savant system per each carrier and can be automatically used when an order is shipped for that customer
- ✓ Prepaid, Consignee, and Third-Party billing methods are available
- ✓ Stores alternate "retail" rates, while the manifest maintains the actual carrier charges
- ✓ Provides data that can be used to compare company shipping costs with amounts billed to customers for Shipping.

## Zebra Integration

Savant WMS has been a Validated Zebra connected solution since 2016. Validated is above certified, meaning Zebra has tested our software with their hardware and Validated that the software and hardware will work as advertised! Our development team and implementation consulting staff have a well-rounded knowledge of how Zebra works and can add value to the customer experience with this expertise.

“

We make at least four times as many beers as we used to, so the complexity of our business is much higher now,” said White. “Thanks to the mobile devices and the WMS solution, we’ve been able to successfully weather the growth and complexity challenges we’ve faced. Managing our growth and our expanded operations manually would have been impossible.

**Sierra Nevada**
