

**ValuTrack**  
TECHNOLOGY SOLUTIONS

# Technology Solutions for Performance-Driven Business

**Helping organizations achieve operational  
excellence since 1989**

ENTERPRISE MOBILITY, RFID, LABELS & TAGS (OFF-SHELF & CUSTOM), PRINTERS, SCANNERS & TABLETS, TEMPERATURE MONITORING, VOICE PICKING

INDUSTRIAL CYBERSECURITY, PROTECT OPERATIONAL TECHNOLOGY WITH CONTINUOUS THREAT DETECTION, SECURE REMOTE ACCESS, AND EDGE VISIBILITY

VIDEO SURVEILLANCE SYSTEMS, ACCESS CONTROL, INTRUSION DETECTION, COMPREHENSIVE FACILITY MONITORING AND MANAGEMENT SOFTWARE

ENTERPRISE BARCODE LABEL DESIGN & MANAGEMENT SOFTWARE, BROWSER-BASED PRINT AUTOMATION

ENTERPRISE BARCODE LABEL DESIGN & MANAGEMENT SOFTWARE, BROWSER-BASED PRINT AUTOMATION

CLOUD WORKLOAD AND ENDPOINT SECURITY, THREAT INTELLIGENCE, AND CYBERSECURITY RESPONSE SERVICES

WAREHOUSE MANAGEMENT SOFTWARE, SUPPLY CHAIN MANAGEMENT, ASSET TRACKING & INVENTORY CONTROL

WAREHOUSE MANAGEMENT SOFTWARE, CUSTOMER ORDER SYSTEM TRACKING, ASSET TRACKING & LOCATING

WIRELESS NETWORK INFRASTRUCTURE, APs, SWITCHES, ROUTERS, NETWORK DESIGN & DEPLOYMENT SERVICES

ELECTRONIC SHELF LABELS, DYNAMIC COMMUNICATORS

ENTERPRISE MOBILITY SOLUTIONS, BARCODE & RFID HARDWARE, LABELS & SUPPLIES

WIRELESS NETWORK INFRASTRUCTURE, APs, SWITCHES, ROUTERS, NETWORK DESIGN & DEPLOYMENT SERVICES

SUPPLY CHAIN MANAGEMENT, MOBILE DEVICE MANAGEMENT, TERMINAL EMULATION

TERMINAL EMULATION, INDUSTRIAL INTERNET OF THINGS, WAREHOUSE MANAGEMENT SYSTEM INTEGRATION

MOBILE COMPUTERS, INTERACTIVE KIOSKS, BARCODE SOFTWARE

HANDS-FREE BARCODE SCANNING, BLE & RF TECHNOLOGY FOR ERGONOMICS

MOBILE BATTERY POWERED CARTS, INVENTORY MANAGEMENT

ENTERPRISE MOBILITY MANAGEMENT, DEVICE PROVISION & MANAGEMENT, DEVICE SECURITY & COMPLIANCE

SECURITY SOFTWARE, ACCESS CONTROL, VIDEO MANAGEMENT, MOBILE CREDENTIALS, ADVANCED SERVICES

BARCODE PRINTING SOLUTIONS, LABELS AND SUPPLIES, PRINTER PARTS

AUTOMATED IDENTIFICATION AND DATA CAPTURE, MOBILE COMPUTERS, BARCODE SCANNERS, AND RFID SOLUTIONS

COMMUNICATIONS SYSTEMS, TWO-WAY BUSINESS RADIOS

INDUSTRIAL NETWORK INFRASTRUCTURE, INDUSTRIAL EDGE CONNECTIVITY, INDUSTRIAL COMPUTING

COLOR THERMAL TRANSFER BARCODE PRINTING

# Professional Services

**RFID** - We provide a full suite of Radio Frequency Identification (RFID) solutions and services, specializing in assisting organizations to achieve a higher level of efficiency and accuracy. We will help reshape your organization by giving you complete visibility of your assets so that you can make intelligent business decisions.

**Supply Chain** - Our team of industry-specific experts will look at your organization's technology infrastructure, workflows, business processes, and other factors in order to provide you with technology solutions, as well as best practice insights that can ensure your supply chain remains productive.

**Cybersecurity** - We offer market-leading cloud-based next-generation antivirus software providing comprehensive 24/7 coverage with integrated threat intelligence and immediate response securing your assets, network, and environment in real time. We will sit down with you and formulate a plan that provides your organization visibility, protection, and threat detection enabling you to secure any OT, IT, and XIOT environment, big or small.

**Networking** - Optimizing your network gives you the power to reach users wherever they are, ensure business continuity no matter what, and accelerate innovative capabilities when it matters most. We can help your organization deploy a robust and unified network for your IT infrastructure.

**Deployment and Training** - We will help you deploy any one of our hardware and software solutions, getting new technology working for you, faster with customizable preloaded information and applications. Not only will we help with deployment, we will train you and your team on how to properly use the solutions to maximize your productivity and ROI.

**Custom Application Development** - When off-the-shelf software programs or generic applications don't quite fit the needs of your company, talk to us about developing a custom software solution or augmenting your existing application to help create efficiencies, optimize workflow and improve your bottom line.

**Service Contract Management** - We provide technology repair, maintenance, and renewal services to support your fleet of devices for as long as you need them in service. We will manage all of your service contracts to ensure that your organization is able to operate uninterrupted by expiration dates.

# Manufacturing & Warehousing Solutions

The right technology to help manufacturers succeed.

## Workflow Automation

Boost efficiency and quality control with workflow automation. We provide a wide variety of printers, scanners, mobile computers, RFID technology, standard and custom labels, verifiers, electronic shelf labels, kiosks and more.

## Barcode Label Design & Management

Simplify your barcode labeling process with comprehensive enterprise label management solutions that improve efficiency through print automation, label management, and browser-based printing. We provide solutions from Teklynx and BarTender.

## Industrial Wireless Networking & Switching

Cutting edge wireless networking solutions and services that enable you to fully optimize and deploy robust and unified wireless networks for their facility's IT infrastructure.

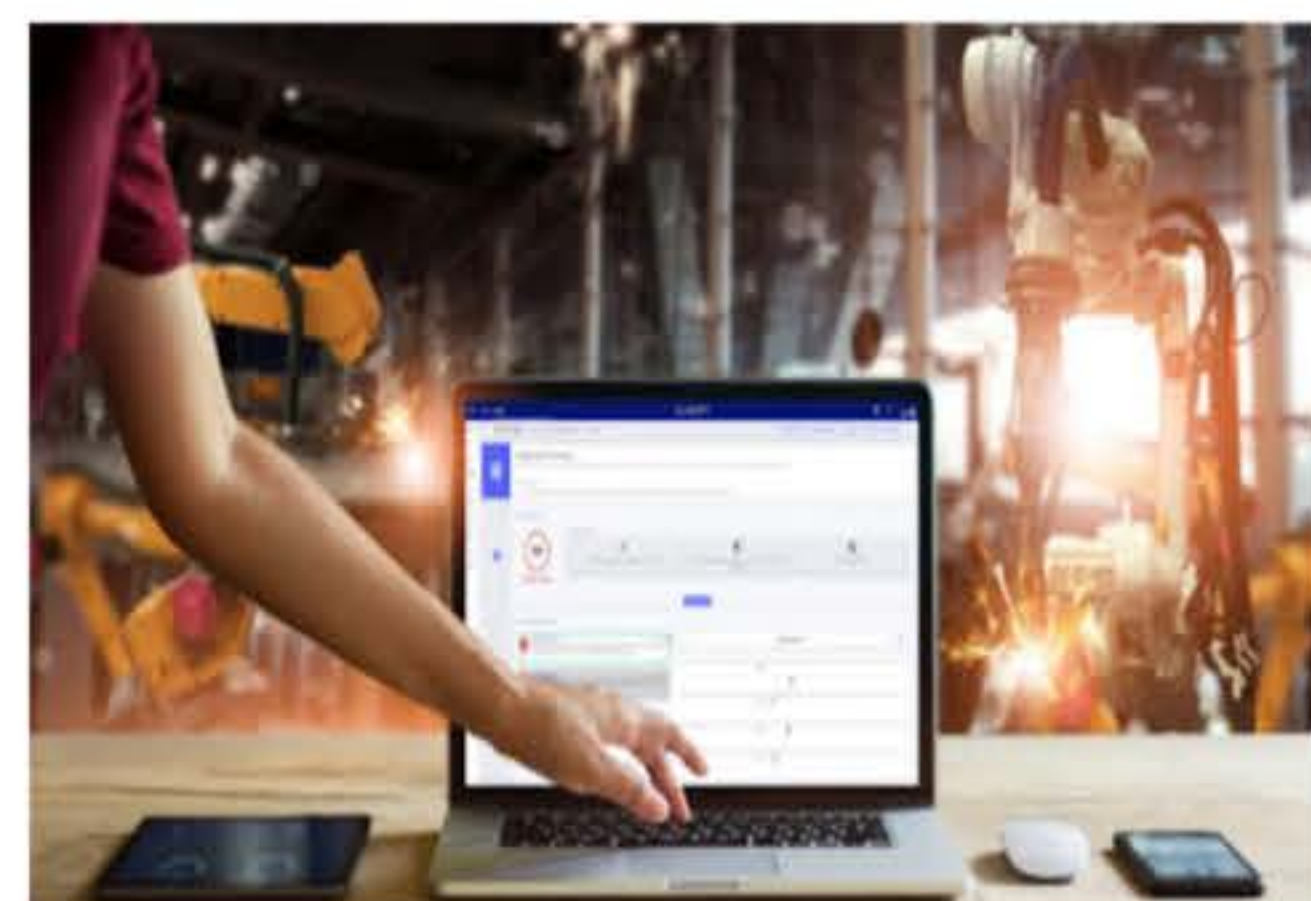

## Warehouse Management System

Gain insights into tracking and management of receiving, internal material movements, manufacturing, shipping transactions, and more with modular WMS solutions that are flexible and are built to grow with your operations.

## Industrial Cybersecurity

A comprehensive industrial cybersecurity solution that reveals and protects all OT, IoT, and IIoT assets within the network while automatically detecting the earliest indicators of threats to those assets via proprietary detection technologies.

## Real-Time Location Systems

Real-time location solutions that not only automatically sense the location of your assets and inventory and streamline your production line, but also allow you to ramp up productivity, boost efficiency and grow your business based on improved insights.

## Device Management Applications

Maximize productivity and gain control of your devices throughout their entire lifecycle, from provisioning to retirement. We help you implement a custom mobile device management solution that ensures your devices are ready for your business demands.

## Facility Security Systems

A wide range of security products and systems that include video surveillance, access control, and more. From simple installations to extensive projects, we offer integrated security solutions based on intelligent technology, backed by superior support.

# Healthcare & Life Sciences Solutions

Technology that promotes patient care and research success.

## Workflow Automation

Boost efficiency and quality control with workflow automation. We provide a wide variety of printers, scanners, mobile computers, RFID technology, standard and custom labels, verifiers, electronic shelf labels, kiosks and more.

## Barcode Label Design & Management

Simplify your barcode labeling process with comprehensive enterprise label management solutions that improve efficiency through print automation, label management, and browser-based printing. We provide solutions from Teklynx and BarTender.

## Industrial Wireless Networking & Switching

Cutting edge wireless networking solutions and services that enable you to fully optimize and deploy robust and unified wireless networks for their facility's IT infrastructure.

## Real-Time Cold Storage Monitoring

Monitor cumulative heat exposure temperature, threshold heat events, freeze events, or a combination of both. We provide a wide range of time-temperature indicators for temperature sensitive vaccines, pharmaceuticals, and medical devices.

## Healthcare & Life Sciences Cybersecurity

A comprehensive cybersecurity solution that fuses a deep understanding of medical workflows and protocols with today's cybersecurity threats, so hospitals can confidently connect and operate all clinical assets on their network while ensuring patient privacy and safety.

## Digital Headsets

Empower teams to talk hands-free in the OR and adjacent rooms. Digital headsets enable clear, calm communication between every member of the team with no raised voices nor straining to hear, reducing stress and creating a better working environment.

## Device Management Applications

Maximize productivity and gain control of your devices throughout their entire lifecycle, from provisioning to retirement. We help you implement a custom mobile device management solution that ensures your devices are ready for your business demands.

## Facility Security Systems

A wide range of security products and systems that include video surveillance, access control, and more. From simple installations to extensive projects, we offer integrated security solutions based on intelligent technology, backed by superior support.

# Retail Solutions

Visibility and insights from the loading dock to point of sale.

## Workflow Automation

Boost efficiency and quality control with workflow automation. We provide a wide variety of printers, scanners, mobile computers, RFID technology, standard and custom labels, verifiers, electronic shelf labels, kiosks and more.

## Barcode Label Design & Management

Simplify your barcode labeling process with comprehensive enterprise label management solutions that improve efficiency through print automation, label management, and browser-based printing. We provide solutions from Teklynx and BarTender.

## Electronic Shelf Labels

Manage all of your barcode label information across every retail store in the country. ESLs give you the power to change promotions, pricing, images, and more across any specific item or every one of your items, all within seconds from your computer.

## Warehouse Management System

Gain insights into tracking and management of receiving, internal material movements, manufacturing, shipping transactions, and more with modular WMS solutions that are flexible and are built to grow with your operations.

## Industrial Wireless Networking & Switching

Cutting edge wireless networking solutions and services that enable you to fully optimize and deploy robust and unified wireless networks for their facility's IT infrastructure.

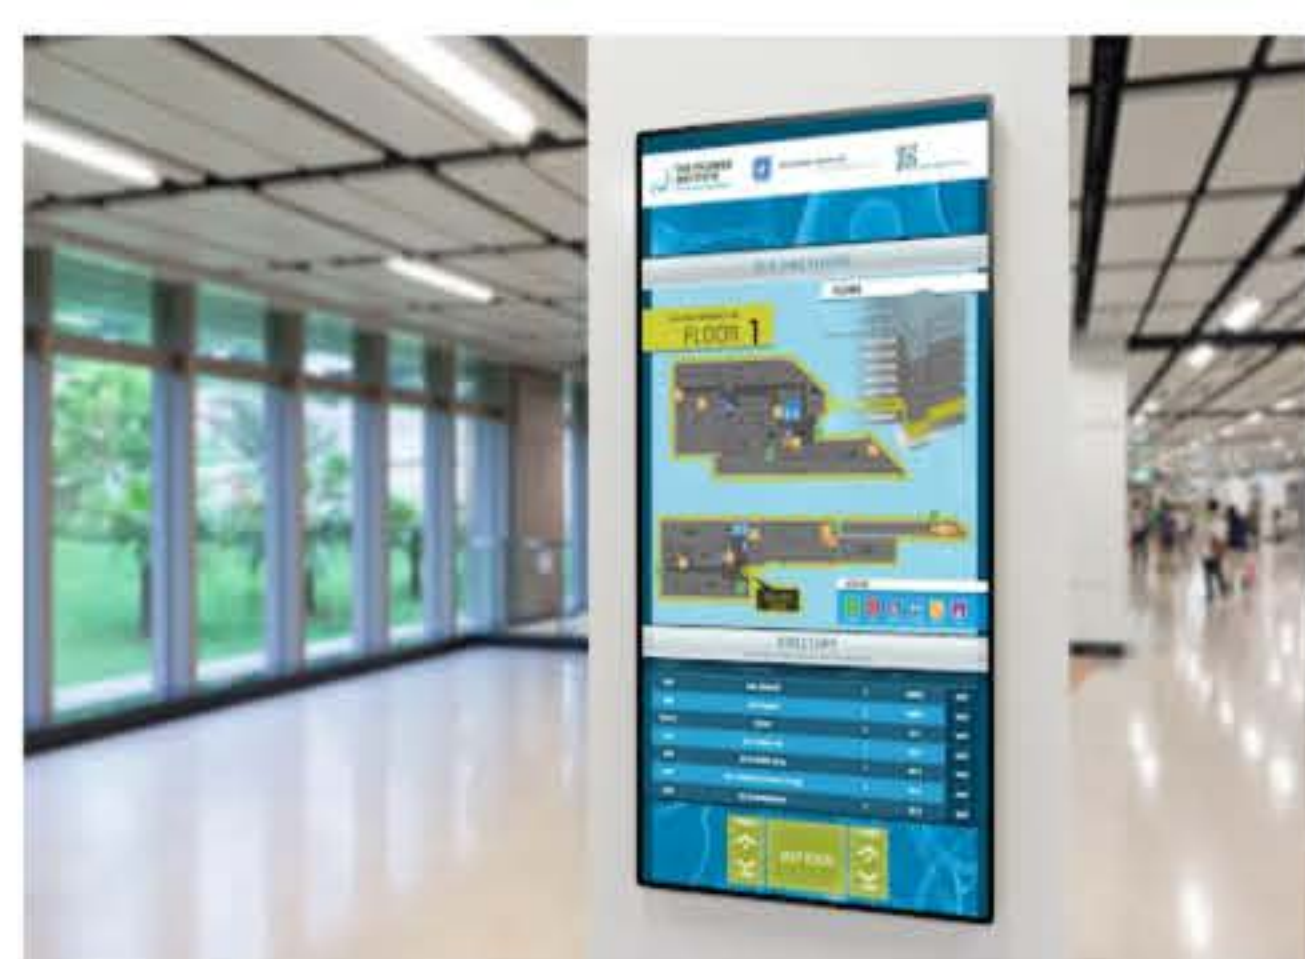

## Point of Sale (POS) Systems

Empower customers with more freedom over their shopping experience, and at the same time free up employees to focus on other tasks. Kiosks are quickly becoming popular as a point-of-sale product, like those you see at a supermarket for self-checkout.

## Interactive Digital Signage

Powerful dynamic signage solutions that give you the ability to ensure no one misses an important message, no matter where they are. Manage all of your visual communication devices from a single centralized application.

## Facility Security Systems

A wide range of security products and systems that include video surveillance, access control, and more. From simple installations to extensive projects, we offer integrated security solutions based on intelligent technology, backed by superior support.

## About ValuTrack

ValuTrack Corporation is a leading provider of end-to-end barcoding, networking, security, and IoT solutions for performance-driven organizations. Our in-depth industry-specific experience, leading-edge technology, and top notch professional services enables us to provide transformational and scalable business solutions that deliver greater ROI and outstanding value.

Since opening our doors in 1989, ValuTrack has been focused on the optimization of the supply chain and mobile workforce's business processes. What sets us apart is our team of technology experts that works closely with you and your organization to understand your goals, provide insight into best practices, and establish a metric-focused strategy that promotes operational excellence.
