Pick Up the Pace in Warehouse Operations

Elevate productivity, accuracy and employee safety with voice-directed picking solutions.

Tight labor markets. Skyrocketing demand. Elevated customer expectations. These are just a few of the factors driving today's warehouses, distribution centers and fulfillment operations to strive for maximize productivity. And whether your operations are focused on high-volume item-level order picking or moving full pallets or cases, **voice-directed picking technology is one of the most effective and proven solutions you can deploy to meet the challenge**.

Almasons GiNi™ Voice is a state-of-the-art voice-picking solution that easily links to your WMS to make your picking workflows faster, smarter and more accurate. It vastly simplifies and streamlines implementing voice-picking technology, enhancing workflows while eliminating complex backend integrations.

Almasons GiNi Voice runs on the widest range of Android devices, including Zebra Technologies' industry-leading portfolio of handheld mobile computers, rugged tablets and wearable computers. This now puts voice-enabled picking within reach of virtually any warehouse operation.

With **Almasons GiNi Voice** and Zebra devices, you can improve picking productivity by as much as 30%, cut employee training time by up to 50% and improve picking accuracy by as much as 90%.

GiNi Voice and Zebra deliver maximum impact across all key performance metrics:

UP TO	UP TO	UP TO	UP TO	UP TO
30%	**90%**	**50%**	**30%**	**20%**
GREATER PRODUCTIVITY	FEWER ERRORS	LESS TRAINING TIME	LESS EMPLOYEE TURNOVER	FEWER ACCIDENTS

VOICE-PICKING TECHNOLOGY

Handle More Volume With the Same Workforce

Almasons GiNi Voice combines with Zebra rugged mobile devices to give you a powerful voice-picking solution that allows you to handle up to 30% more volume without expanding your workforce. And it's easy to deploy, with no complex backend integration required.

- Hands-free and heads-up operation allows users to focus fully on the task at hand, boosting speed, accuracy, and safety.

- Native language prompts and responses are easy to learn, decreasing the training time needed for new workers to reach maximum productivity.

- 40 popular languages supported out of the box, without voice training. Untold dialects and styles of speaking are accommodated.

- Using advanced technology elevates workers' job satisfaction and improves retention.

- Most deployments completed in 4–8 weeks. 100% ROIs commonly achieved in 6 months.

Give us 30 minutes, and we'll show you exactly how you can boost picking productivity up to 30% in just 30 days— without a costly and complex IT project.
