## Deliver the Best Quality Care when it Matters Most

In order to achieve positive healthcare outcomes, we provide a comprehensive suite of solutions designed address critical aspects of healthcare operations. By leveraging modern technologies such as barcode scanning and RFID tracking, hospitals and medical centers can achieve medication administration accuracy, asset tracking and management, streamlined workflows, regulatory compliance, and enhanced data analytics.

### Featured Healthcare Solutions

#### Bedside Point of Care

Deliver accuracy when it comes to patient identification, medication administration, specimen collection and EHR retrieval.

#### Early Sepsis Detection

Enterprise Sepsis platform that assists hospitals with alerting, diagnosis, timely delivery and management of treatment, and reporting.

#### Asset Tracking and Inventory Management

Real-time tracking of hospital assets and inventory such as blood bags, IV pumps, heart monitors, beds, and wheelchairs.

#### Pharmacy Management

Manage and track the medication administration and ensure the quality of temperature sensitive medical products.

#### Admissions and Patient ID

The largest selections of custom barcode and RFID hospital bracelets, patient ID wristbands, labels and tags on the market.

#### Clinical Communication

Healthcare headset systems that enable teams to talk hands-free in the OR and adjacent rooms.

#### Physical Security

Access control, video surveillance, and intrusion detection to secure your facilities and assets.

#### Cybersecurity

Secure sensitive data, clinical assets, and hospital operations via a comprehensive healthcare XIoT security platform.
