Claroty Edge

A Fast and Simple Solution to Deliver XIoT Visibility in Minutes

The XIoT Security Challenge

Effective industrial cybersecurity requires a complete inventory of all OT, IoT, and IT managed and unmanaged assets across an organization's entire industrial environment. However, gaining this caliber of visibility can be challenging for many reasons, including:

- Standard IT solutions and scanning methods are typically incompatible with and unsafe for industrial networks
- Traditional industrial asset inventory solutions often require hardware that can be costly, complex, and time-consuming to deploy
- Many industrial networks are geographically isolated and/or airgapped, making them difficult to access in order to install hardware
- Traditional industrial asset inventory methods such as passive data collection and offline file-parsing may not be compatible or otherwise suitable for all networks and use cases under all circumstances

The Solution

Claroty Edge is a highly flexible, Windows-based edge data collector that delivers complete visibility into industrial networks in just minutes without requiring network changes, utilizing sensors, or having any physical footprint at lower network levels.

This fast and easy solution can be deployed to run on-premises or via SaaS to reveal in-depth details on both managed and unmanaged industrial assets that could otherwise only be discovered — if at all — via methods that may not always be ideal or desirable for all networks and use cases under all circumstances.

Edge Benefits At A Glance

Complete Visibility

Claroty Edge provides a complete inventory of your managed and unmanaged XIoT assets and all risks and vulnerabilities affecting them

Zero Changes & No Hardware

Claroty Edge safely leverages your existing architecture without requiring you to deploy hardware at lower levels of the network

Results in Minutes - Not Days

Claroty Edge deploys and delivers full visibility into any industrial network in less than 10 minutes

High Flexible Deployment

Claroty Edge's flexible cloud and on-premises deployment options make the solution fully suitable for connected, air-gapped, and cloud-enabled networks.

Key Capabilities & Use Cases

XIoT Asset Discovery

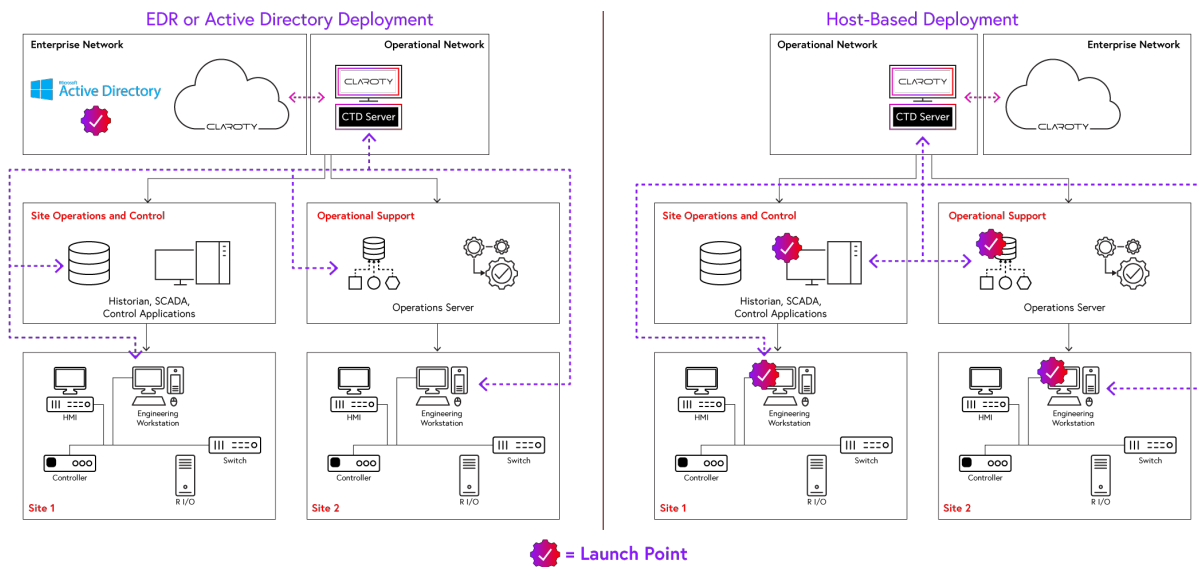

- Gain complete, near-instantaneous visibility into all OT, IoT, and IT managed and unmanaged assets
- This visibility forms the strong foundation you need for effective industrial cybersecurity and the ability to support a broad range of related use cases

Risk & Vulnerability Management

- Easily identify and manage the risks and vulnerabilities – such as missing critical patches, end-of-life indicators, and CVEs – affecting your managed and unmanaged assets
- These capabilities empower you to better protect your industrial network by reducing its exposure to risk

Other use cases include:

- **Audit & Compliance:** Easily, quickly, and effectively support audit requests and report compliance for your industrial network, resulting in greater confidence in your reporting, a reduced risk of failed audits, and stronger compliance and overall security posture.
- **M&A Due Diligence** Conduct M&A due diligence on target companies' industrial networks more easily, quickly, and effectively, leading to a rapid fulfillment of M&A requirements and clear insight into operational risk posture – all while adhering to LOI specifications.
- **Incident Response:** Immediately arm responders with a full inventory and risk and vulnerability assessment of the compromised environment, thereby optimizing incident response efforts including impact assessments, scoping, and forensics for industrial networks.

About Clarity

Clarity empowers industrial, healthcare, and commercial organizations to secure all cyber-physical systems in their environments: the Extended Internet of Things (XIoT). The company's unified platform integrates with customers' existing infrastructure to provide a full range of controls for visibility, risk and vulnerability management, threat detection, and secure remote access.

Backed by the world's largest investment firms and industrial automation vendors, Clarity is deployed by hundreds of organizations at thousands of sites globally. The company is headquartered in New York City and has a presence in Europe, Asia-Pacific, and Latin America.
